AZIMUTH : ARCHITECTURE MARKS TEN YEARS IN BUSINESS

Dallas, Texas (February 8, 2005) 2005 marks Azimuth : Architecture, Inc.'s tenth anniversary in business. The firm was founded in 1995. Now, Azimuth : Architecture offices in an open-plan loft in the historic Goodyear Tire and Rubber Building in the Fair Park area. Over the years, the firm has experienced the challenges and successes that many small businesses experience—staff growth, turnover, and office moves. Project sizes have grown from overflow work from other architecture firms to projects that include hospitals, surgery centers, corporate headquarters, call centers, industrial office complexes, and recreation centers.

“The two keys to our success would be our commitment to excellent client service and principal involvement in every project. No matter what size we become, there will always be a principal directly involved in the design and management of every project,” said John Taylor, Principal.

Azimuth : Architecture, Inc., founded in 1995, provides architectural and interior design services to health care facilities, industrial/office complexes, recreational centers, and corporate offices. Recent projects include the Palm Beach Tan and Mystic Tan Corporate Offices, Pine Creek Medical Center, and Watermark Medical Building. The firm provides a number of services, including: master planning / site planning, space planning and interior design, as well as architectural design.
