REGIONAL PAIN CARE CENTER OF NORTH TEXAS ADDS LOCATION

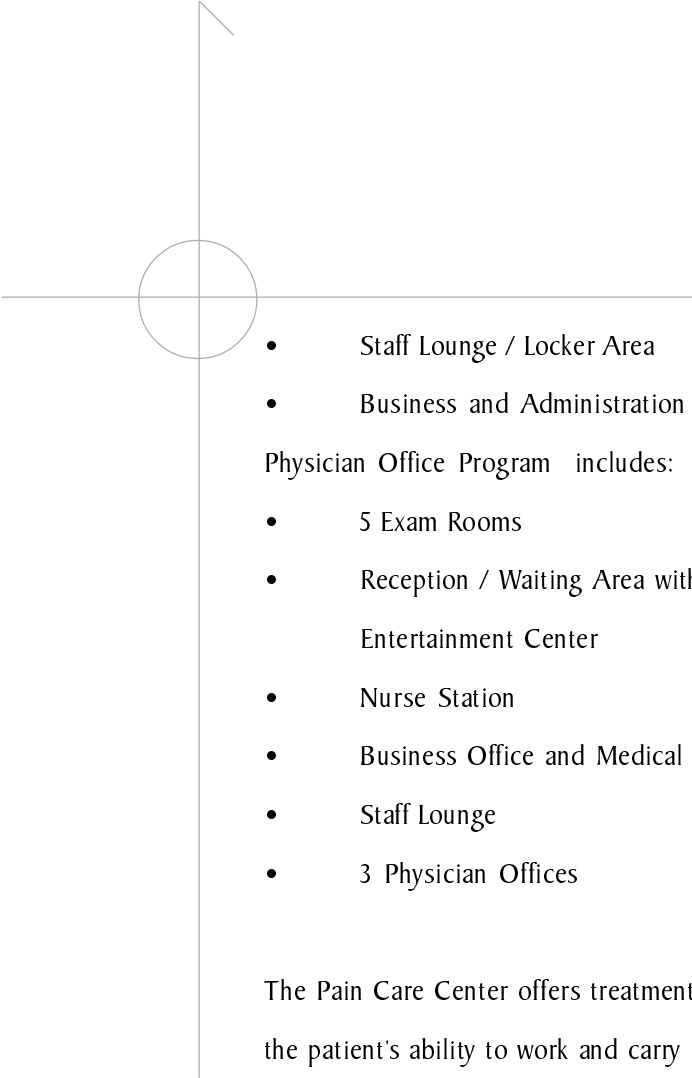

ALLEN, TX (October 25, 2004)– Patients suffering from headaches and chronic pain now have relief in Allen, Texas. The new 4,758 s.f. Pain Care Ambulatory Surgery Center and 2,364 s.f. Regional Pain Care of North Texas Physician Office Suite are now complete in the new Twin Creeks Medical Office Building. Azimuth : architecture provided architecture, interior design, and furniture and artwork services for both the ambulatory surgery center (ASC) and the physician office suite.

The Transitional design style appeals to the wide range of patient age groups. The Pain Care ASC and Regional Pain Care Physician Offices were designed to share a common thread in color palette. The amber accents in the Physician Offices and the cobalt accents in the ASC create a cohesive, yet distinctive design. Decorative, patterned Murano glass pendants highlight the lobby. Specialty lighting, both direct and indirect, is used in the lobby and along the corridor. Other design features include: cherry veneer millwork, granite countertops, and “floating” glass check-in windows. The madras patterned Vinyl Composite Tile in the Pre-Op / Recovery area is reinforced with matching cubicle curtains.

ASC Program includes:

- 2 Operating Rooms
- 1 Procedure Room
- Centralized Pre-Op and Recovery Area
- Pharmacy Services
- Consultation Office
- Reception / Waiting Area

-more-

- 
- Staff Lounge / Locker Area
 - Business and Administration Offices

Physician Office Program includes:

- 5 Exam Rooms
- Reception / Waiting Area with Built-in Entertainment Center
- Nurse Station
- Business Office and Medical Records
- Staff Lounge
- 3 Physician Offices

The Pain Care Center offers treatment aimed at relieving pain and when appropriate, increasing the patient's ability to work and carry out a much improved lifestyle. Some examples of treatment methods are: Physical Therapy, Nerve Blocks, Surgery, Medication, and Psychotherapy Services.
